ABOUT US

Hello there,

We are a manufacturer of concrete forming products. We manufacture ties (any lengths, cone tie, styrofoam tie, corner tie) and accessories (bracket, corner etc.) for the concrete forming industry.

Proud of more than a 30 years experience in the industry as concrete formwork contractor, sales representative and technical support are able to understand your needs and make improvements that will facilitate your work.

Our goal is to provide high quality products at a competitive price. In addition, enjoy a personalized service by dealing directly with the owner.

Thank you for trusting us. For all your needs and to meet us, do not hesitate to contact us.

REGULAR TIES

Available from 4" to the length you need for your projects. Sold in box of 500

CONE TIES

- Available with 1 or 2 cone.
- Bigger cone also available..

" V " TIES

Used to solidify the corner of a wall.

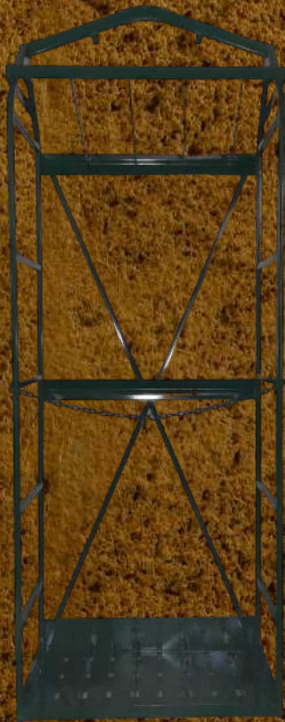

INSULATED WALL TIES

Especially punched to fit 3" x 3" steel plate and hold styrofoam.

On request the plates can be welded.

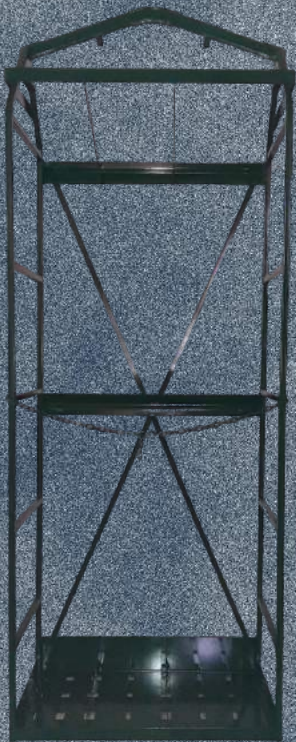

PANELS CAGES

Facilitates the transportation and handling of all size panels. Capacity: 20-22 panels. Optional tilting head. Several color available.

FILLERS CAGES

Facilitates the transportation and handling of all size fillers. Optional tilting head. Several color available.

CORNERS CAGES

**Facilitates the transportation
and handling of all corners.
Optional tilting head. Several
color available.**

LUMBERS CAGES

Facilitates the transportation and handling of all lumbers. Optional tilting head. Several color available.

ACCESSORIES CAGES

Cage to transport your tools, can be made on request to suit your needs. Different model available (Sprayer, Scaffolding brackets, Tools, ect)

CUSTOM MADE CAGES

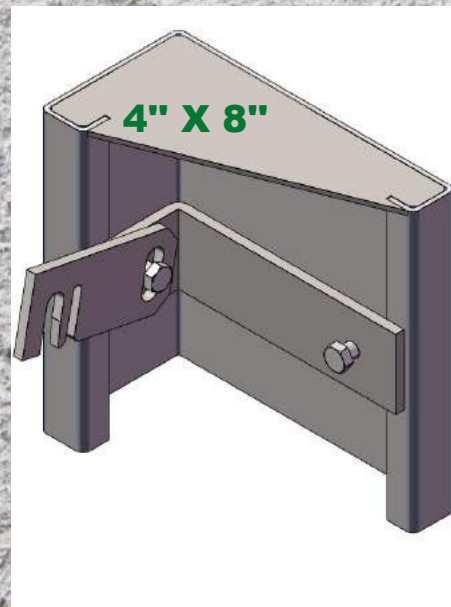

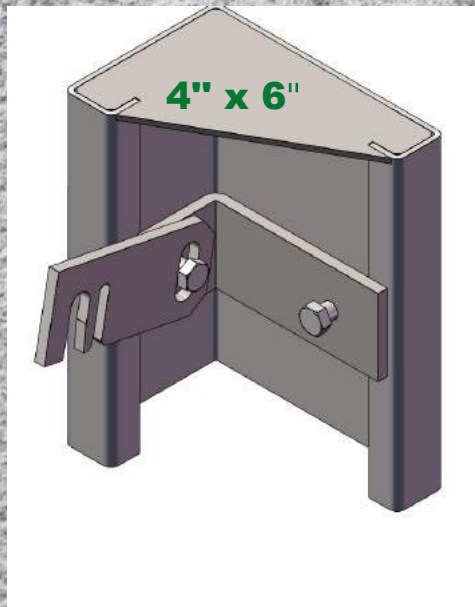

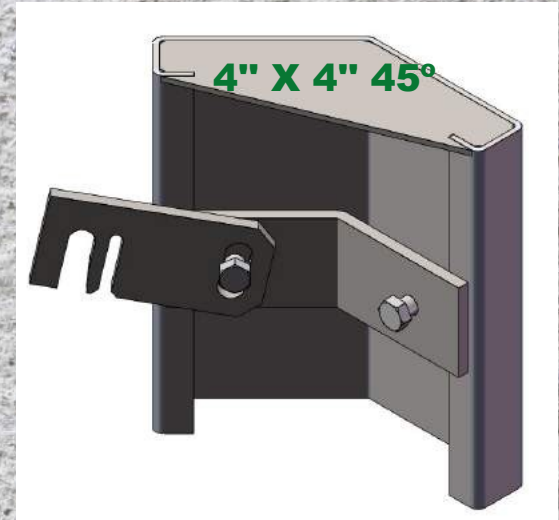

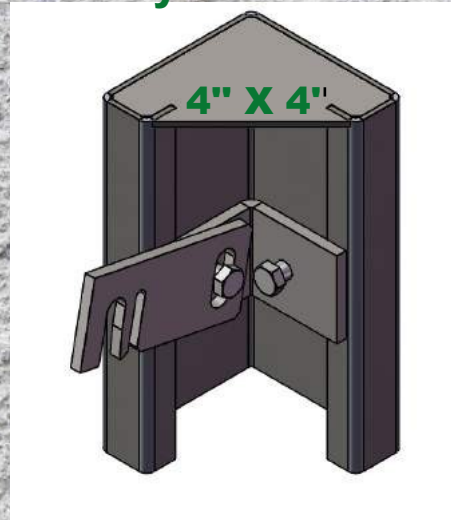

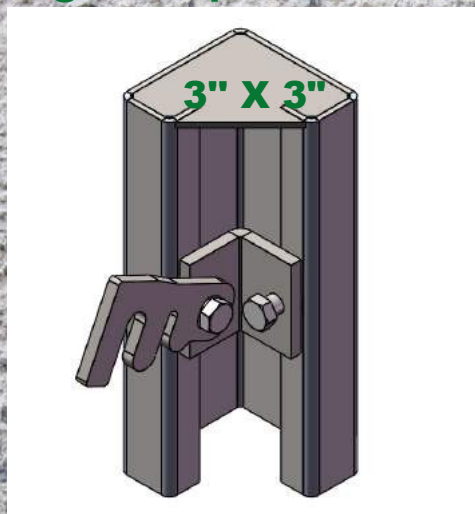

**Custom made cage with
two or three sections.
Optional tilting head.
Several color available.**

INTERIORS CORNERS

All of our corners are bent at our factory for better accuracy.

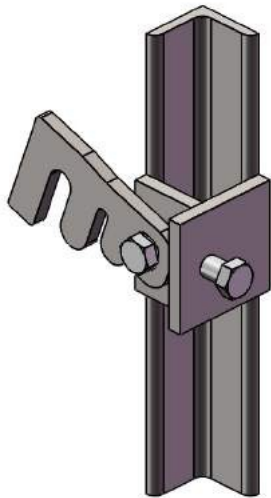

Designed with a fold, which makes them more durable. Among the highest qualities in the industry.

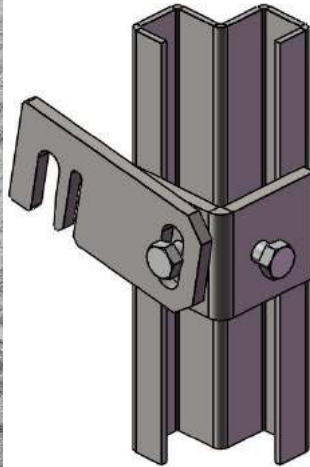

EXTERIORS CORNERS

All of our corners are bent at our factory for better accuracy. Designed with a fold, which makes them more durable. Among the highest qualities in the industry.

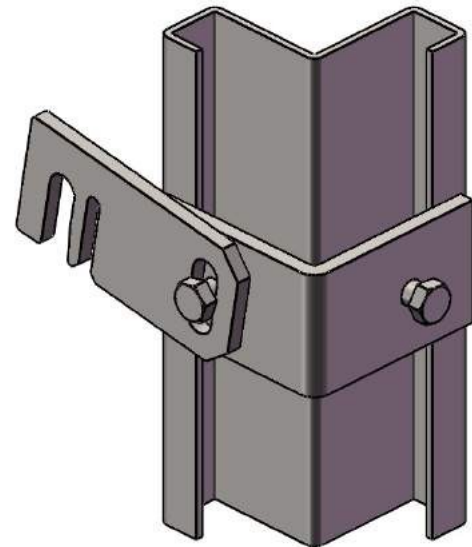

1" NEUTRE

1" X 1"

2" X 2"

LATCH AND BRACKETS

6" LATCH: To replace a latch on a 6" or 24" pannel.

4" LATCH: To replace a latch on a steel corner.

1" LATCH: To replace a latch on our 4" or 5" fillers. To replace a latch on a neutral corner.

HALF CLIP: Fastens the tie to the panel when latch cannot be used.

EXTERIOR CURVED WALL BRACKET: This lock is designed to secure two interior panels with variable angle.

INTERIOR CURVED WALL BRACKET: This lock is designed to secure two interior panels with variable angle

REVERSIBLE OFFSET BRACKET: hold two panels together when the bars don't line up.

T BRACKET 2": allows you to lock 2 panels at 90° without using a corner.

L BRACKET 3": allows you to lock 2 panels at 90° without using a corner.

45° BRACKET: Designed to fix two exterior panels at an angle of 45 °.

SCAFFOLDING BRACKET

20" ALUMINUM SCAFFOLDING BRACKET: can attach to any panel. The top of the support attaches to a bolt on the panel and the bottom is fixed with a nail. Light weight and stackable.

20" STEEL SCAFFOLDING BRACKET: can attach to any panel. The top of the support attaches to a bolt on the panel and the bottom is fixed with a nail.

FOOTING BRACKET

STEEL FOOTING BRACKET: designed to securely hold lumber in place. Available in 24", 30", 36" et 48". Other dimensions on request.

ADJUSTABLE FOOTING BRACKET: designed to securely hold lumber in place. Adjustable from 24" to 48". Other dimension on request.

OIL AND SPRAYER

STANDARD 16 " X 16 " X 32 "
OIL SPRAYER: Honda GX-160
engine (4.8 hp). With oil level
alert. 100 feet high pressure
hose (2000 lbs). 24 " or 12 "
spray guns with double jet.

**205 liters
barrel.**

**HOIL SPRAYER WITH
CUSTOM TANK:** Honda GX-
160 engine (4.8 hp). With oil
level alert. 100 feet high
pressure hose (2000 lbs). 24"
or 12" spray guns with
double jet.

**1000 liters
"tote".**

TOOLS AND HARDWARE

LIGHT STRIPPING TOOL: Help strip corner and panel.

SINGLE TIE-BREAKER: designed to break ties and quickly.

TRIPLE TIE-BREAKER: designed to snap ties easily and quickly from 3 different angles. The hexagonal head allows you to screw or unscrew the bolts on the panel.

ALUMINUM CONCRETE SPREADER: designed to spread and give a nice finish to concrete Available in 24", 30" et 36".

ALIGNMENT BRACKET: use quickly and solidly attaches a rope to the top of the panel to align the wall.

ANCHOR BOLT 1/2" x 8": C/W nuts and washer.

SHOULDER BOLT AND SLEEVE: To fix your panels.

LOOP TIE: Available in 6", 7", 8". Others dimensions on requested. 2500 per bundle.

**COMMON NAILS: Available in 2", 3", 3-1/4" et 3-1/2"
50 pounds per boxes.**

SHEETS: Box of 500 styrofoam sheets

WALL ALIGNER WITH SCREW FOR 2" x 4": used to re and solidify the alignment of part of the formwork.

STRONGBACK WALER 2" x 4": designed to solidify the wall when you stack panels.

TOP WALER FOR 2" x 4": to straighten and align the panel heads in order to obtain a straight concrete surface.

Wall ALIGNER FOR 4" x 4" WITH SCREW: Helps straighten a wall of panels by tightening the screw

HINGE CORNER LOCK: for adjustment and to hold an adjustable corner at the desired angle if needed

H FOR PANELS BRACKET: designed to overlap your panels to create a higher wall.

H BRACKET FOR 2" x 10": To place a beam over the panels.

SCAFFOLDING ADAPTOR FOR 2" x 2" CORNER: designed to be able to install a support scaffolding.

SCAFFOLDING ADAPTOR FOR 1" CORNER: designed to be able to install a support scaffolding.

STACKING PLATE: firmly holds the stacked panels. The notch in the plate keeps the tie from moving, providing alignment and stability.

PANELS

Our form are manufactured from premium quality materials from the veneer to the steel that we use. All the specifications and dimension are vigorously applied.
